ESS-EXCLUSIVE SERVICE & SUPPORT, ESS MEDICAL PERFORMANCE

Independent, unique and successful

Finding the correct mode of treatment and the right people offering it is in many cases the first and most important step to proper treatment. To make your task simple, ESS-Exclusive Service & Support, ESS Medical Performance is at hand.

Set up by the enterprising Iris Dapper, ESS is a Dubai-based company with a branch in Singapore and Germany to help you make the right choice in selecting the best treatment solution. The company is the first such venture worldwide and is completely independent of tie-ups with any one source.

Health support

The company has been providing this service to clients living in the UAE/GCC-countries seeking special treatment in Singapore or Germany in the areas of interior surgery, specialists for implantology, plastic surgery and creating connections to transplantation centres. ESS helps find the neces-

sary specialists (doctors, professors, clinics, hospitals), while establishing a cooperative link between the patient and these professionals. It undertakes planning and coordination of all necessary arrangements (flights, transfers, hotels etc.)

In addition to the health support ESS is able to offer special VIP services and special arrangements if requested.

Singapore connection

ESS represents one of the best healthcare providers in Singapore. The hospital offers excellent medical care, qualified staff and state-of-the-art facilities at highly competitive rates.

The hospital is a leading player in eye (Lasik) surgery. It uses the latest generation 5 Lasik ZYOPTIC technology. Over 1800 procedures have already been executed using

Iris Dapper, Managing Director & CEO, ESS-Exclusive Service & Support, ESS Medical Performance

this procedure. Besides this, the hospital offers the full range of ophthalmic services, including cataract, cornea, glaucoma, medical retina, neuro-ophthalmology, oculo-plastics, surgical retina and Uveitis.

Besides this, the hospital provides highest-quality treatments in the areas of orthopaedic surgery; cardiac; thoracic and vascular surgery; otolaryngology — head

and neck surgery; paediatrics; paediatric surgery; haematology — oncology pathology; hand and reconstructive microsurgery, psychological medicine, oncology, neurology surgery, transplantation, neonatology, urology, urology obstetrics and gynaecology, oral and maxillofacial surgery, preventive dentistry, restorative dentistry, breast surgery, hair transplantation (micrografting), liposuction and liposculpting, eyelid surgery.

In addition to medical treatment ESS is also able to offer special education programmes for local hospitals and doctors to enable know-how transfer and sharing of best-practices between its partner hospitals in Singapore and clinics in the UAE/GCC region.

In addition, specialists from Singapore can be invited over to the country to help local hospitals in selecting the right technologies, equipment and procedures — all at the right price. ■

CHIROPRACTIC SPECIALTY CLINICS

Specialising in neuromusculoskeletal disorders

The mission of Chiropractic Specialty Clinics in Abu Dhabi is to provide the people of the UAE a natural, non-drug, non-surgical alternative for the treatment of neuromusculoskeletal conditions.

Many symptoms common to people of the Middle East (including neck pain, headaches, back pain, muscle spasms, leg symptoms and disc problems) were previously only given three treatment options: drugs, surgery or instructions to 'live with it'.

The chiropractic medical

specialty provides a non-drug, non-surgical option for treatment. Dr. Troy Ansdahl, CEO of Chiropractic Specialty Clinics, says, "Our vision began in Rochester, Minnesota in the USA, a leading international health care destination. It was there that we first introduced chiropractic to many citizens from the Gulf. It is because of our many positive experiences with international clientele that we chose to share our medical specialty with the people of the UAE.

"As specialists, the doctors at Chiropractic Specialty

Clinics are trained to recognise what they can treat, but just as important, are able to differentially diagnose and refer to the appropriate specialty conditions which are out of their area of expertise," says Dr. Dale Schmolz, Chief Operating Officer, Chiropractic Specialty Clinics.

Because chiropractic care optimises nerve function, and the nervous system controls virtually every cell of the body, doctors at the Chiropractic Specialty Clinics successfully treat a number of neuromusculoskeletal disor-

ders. The 10 most commonly treated conditions are: low back pain; disc problems; neck pain; muscle spasms; headaches; sports injuries; tension; upper back pain; arm/leg symptoms; and middle back pain.

Chiropractic Specialty Clinics initial UAE location is in the Tower 4 of the Marks & Spencer/Fotash Al Khair Center in Abu Dhabi. A second clinic will be opening in Dubai, as part of the Dubai Healthcare City in the fall of 2004. The clinic website is: www.chiropracticuae.com ■
